Mobile Development: Flutter, Android Development

Game Development: Unity Engine (2D/3D), C# scripting

Graphic Design: Photoshop, Illustrator, Piskel, Canva

Tools & Frameworks: Git, Firebase, Visual Studio Code, Jira, Docker

EXPERIENCE

Freelance Web Developer

Self-Employed | Tunis, Tunisia | 2022 – Present

- Developed and deployed responsive websites for local businesses using HTML5, CSS, and JavaScript.
- Built dynamic user interfaces with React.js, reducing load times by 25%.
- Integrated REST APIs to ensure dynamic and seamless front-end performance.
- Designed back-end logic using Node.js and MongoDB to manage client databases effectively.

Unity Game Development Intern

Virtual Solutions Co. | Tunis, Tunisia | Summer 2023

- Designed and developed a 2D platformer game prototype using Unity Engine and C# scripts.
- Implemented animations, level design, and scoring systems to optimize player engagement.
- Debugged game mechanics to eliminate crashes, reducing bug rates by 30%.
- Collaborated with senior developers to explore best practices in game optimization.

Mobile Application Developer (Freelance)

Freelance Project | Remote | 2023

- Created a Flutter-based mobile app that connects local shops with consumers.
 - Integrated real-time Firebase database to manage products, users, and orders dynamically.
 - Worked with a UI/UX designer to ensure high usability and performance standards.
-
